

ENTREPRENEURSHIP · INTERMEDIATE

Entrepreneurship & Venture Builder

Build your venture one validated step at a time.

Build a real venture from idea to validation, MVP, pilot, traction and scale readiness.

 10–16 weeks

 7 modules

 Professional learning

Explore the learning experience →

Practical learning. Clear progression. Work you can explain.

YOUR NEXT CAPABILITY

What will you be able to do?

A mentor-led execution program with persisted stage gates, evidence, versioned artifacts and measurable launch readiness.

Validate a customer problem with evidence

Design a viable business model and pricing

Build and test an MVP

Launch a pilot and measure traction

Prepare a credible scale plan

Who this is for

- Aspiring founders
- Early-stage experimenters
- Professionals transitioning into entrepreneurship
- Founder teams preparing to launch

Your starting point

- A problem or opportunity worth exploring

Your progression at a glance

FROM CONCEPT TO EVIDENCE

Learn it. Apply it. Explain it.

Move from guided concepts to practical exercises and a coherent piece of work. Use the course resources to revisit difficult ideas and make your reasoning visible.

THE CURRICULUM

A clear route through the subject.

Every module builds towards practical work. The course outline below is aligned with the academy's current program catalog.

1 Idea and Opportunity

Frame the problem, customer and why now.

- Opportunity framing
- Problem clarity
- Target customer
- Mentor selection review

2 Customer Validation

Test assumptions with evidence.

- Interview planning
- Customer discovery
- Validation evidence
- Mentor validation gate

3 Business Model

Value, pricing and commercial logic.

- Value proposition
- Revenue and pricing
- Unit economics
- Business model review

4 MVP Build

Scope, build and test the smallest useful product.

- MVP scope
- Prototype and architecture
- Test plan
- MVP readiness review

5 Pilot Launch

Operate a controlled market test.

- Pilot design
- Go-to-market experiment
- Launch checklist
- Launch gate

6 Traction and Learning

Measure behavior and improve.

- Metrics
- Feedback loops
- Experiment results
- Traction review

7 Scale and Production

Prepare systems, team and narrative.

- Operating model
- Security and compliance readiness
- Scale plan
- Final showcase

BUILD SOMETHING THAT DEMONSTRATES YOUR LEARNING

A reviewed venture evidence portfolio

Develop a problem statement, gather customer evidence, build and test an MVP and refine your venture through mentor-reviewed stage gates.

Customer validation and business model

MVP and pilot evidence

Pitch narrative and stage-review history

Tools and working methods

Opportunity brief

Customer interviews

Business model and unit economics

MVP scope

Launch and traction metrics

Tools are part of the learning workflow, not partner endorsements. Examples may evolve while preserving the learning outcomes.

Delivery

Cohort-based learning · 10–16 weeks

Confirm the current schedule, delivery arrangements and any prerequisites before enrolling.

Completion

A completion certificate is available after the required course work.

Course completion is not a job, placement or funding guarantee.

Your next steps

- 1 Review the curriculum and your starting point.
- 2 Review current enrollment options and delivery details.
- 3 Start learning, keep your evidence and track your progress.

INSIDE THE LEARNING EXPERIENCE

Turn an idea into a falsifiable customer hypothesis

A founder proposes crop-advisory software for small farmers. Before building the product, the team needs evidence that a specific problem is important enough to change behavior.

Understand the concept

Separate the customer segment, observed problem and proposed solution. Interviews should explore recent behavior rather than ask people to praise an idea. Record evidence that contradicts the hypothesis as well as evidence that supports it. A mentor gate checks the quality of the evidence and the next experiment; it does not guarantee commercial success or funding.

Worked example

Hypothesis: a defined farmer segment struggles with a specific decision.

Interview: ask about the most recent occurrence and current workaround.

Evidence: record context, frequency, consequence and direct observations.

Synthesis: group patterns and note contradictions.

Next test: choose one uncertain assumption and an observable outcome.

Interpret the result

The stage artifact is an evidence-backed problem statement, not a feature list. The team may narrow the segment, revise the problem or stop the idea based on what it learns. Consent and privacy govern how interview notes are stored and shared.

Knowledge check

Why is “Would you use my app?” weak validation?

Explanation: A hypothetical positive answer does not establish actual behavior, urgency or willingness to change the current workaround.

YOUR PRACTICAL ASSIGNMENT

Build evidence, not just familiarity.

Turn an idea into a falsifiable customer hypothesis

Your task

- Draft a segment-specific problem statement and interview guide.
- Synthesize interview notes into patterns, contradictions and open questions.
- Submit a validation summary and respond to mentor-requested changes.

Submission review criteria

- Behavioral evidence distinguished from opinions
- Contradictions and privacy obligations are visible
- Next-stage request justified by evidence rather than enthusiasm

Submit

A working artifact or analysis, a short explanation of your decisions, and evidence that addresses each review criterion.

Reflect

Describe one failed approach, how you diagnosed it, and what you would test next. Identify limitations instead of hiding them.

Your project connection

Develop a problem statement, gather customer evidence, build and test an MVP and refine your venture through mentor-reviewed stage gates.

Use the sample assignment as a stepping stone toward the course project, not as a substitute for the full curriculum.
