THE SKILLS THE ROLE NEEDS

Data Analytics Path - learned by building, not memorising.

Turn raw data into trustworthy analysis and decision-ready stories. Every capability is connected to deliberate practice, evidence and review.

5

Demonstrate

CORE PROGRAM

From foundation to applied delivery.

10-16 weeks · 4 current BRD-aligned modules · practice and evidence in every stage.

01

Analytics Foundations

Questions, metrics and data quality.

Business questions and KPIs · Excel analysis · Data quality · Analytical thinking

02

SQL and Data Preparation

Query and shape data.

SQL foundations · Joins and aggregation · Cleaning workflows · Reusable analysis datasets

03

Python and Statistics

Programmatic analysis and evidence.

Pandas workflows · Exploratory analysis · Practical statistics · Experiment interpretation

04

BI and Storytelling

Dashboards and decisions.

Visualization principles · Dashboard design · Stakeholder narrative · Analytics capstone

TOOLS & PRACTICE

Build with the current working set.

 Excel SQL Python and Pandas Power BI or Tableau

CAPSTONE DIRECTION

Frame a realistic problem, build the role-appropriate artifact, explain the trade-offs, respond to review and complete the published criteria.

OUTCOMES & BEYOND

Build skill. Build confidence. Build evidence.

No inflated promises - a clear route from learning to reviewable work and verified completion.

Query and prepare data

Ideal participants

- 1 Analysts
- 2 Developers moving into data
- 3 Business professionals

What you will demonstrate

01 · Query and prepare data

Documented, reviewable and connected to the learning record.

02 · Build trustworthy dashboards

Documented, reviewable and connected to the learning record.

03 · Apply practical statistics

Documented, reviewable and connected to the learning record.

04 · Communicate decision-ready insights

Documented, reviewable and connected to the learning record.
