

Full-Stack Development · Multi-level

Become a full-stack developer. **Build. Ship. Scale.**

Build accessible web interfaces, secure APIs, data-backed applications, automated tests and a production-ready capstone.

Hybrid guided learning

16-24 weeks

4 modules

THE SKILLS THE ROLE NEEDS

Full-Stack Developer Path - learned by building, not memorising.

Frontend foundations to MERN, MEAN, .NET or Java backend specialization. Every capability is connected to deliberate practice, evidence and review.

React or Angular

The learning journey

Move from understanding to demonstrable capability.

1

Understand

2

Practice

3

Build

4

Review

5

Demonstrate

CORE PROGRAM

From foundation to applied delivery.

16-24 weeks · 4 current BRD-aligned modules · practice and evidence in every stage.

01

Web Foundations

Accessible browser experiences.

Semantic HTML · Modern CSS · JavaScript and TypeScript · Accessibility and responsive design

02

Frontend Engineering

Component-driven web applications.

React or Angular foundations · State and forms · Data fetching · Frontend testing

03

Backend Specialization

Choose Node.js, .NET or Java.

API design · Authentication and authorization · Validation and errors · Backend testing

04

Data and Production

Persist, deploy and operate.

SQL modeling · NoSQL patterns · Docker and CI/CD · Full-stack capstone

TOOLS & PRACTICE

Build with the current working set.

HTML, CSS and TypeScript

React or Angular

Node.js, .NET or Java

SQL and MongoDB

Git, testing and cloud

CAPSTONE DIRECTION

Frame a realistic problem, build the role-appropriate artifact, explain the trade-offs, respond to review and complete the published criteria.

OUTCOMES & BEYOND

Build skill. Build confidence. Build evidence.

No inflated promises - a clear route from learning to reviewable work and verified completion.

Build responsive web applications

Ideal participants

- 1 Students
- 2 Developers switching stacks
- 3 Career returners

What you will demonstrate

01 · Build responsive web applications

Documented, reviewable and connected to the learning record.

02 · Develop secure production APIs

Documented, reviewable and connected to the learning record.

03 · Work with SQL and NoSQL data

Documented, reviewable and connected to the learning record.

04 · Ship a portfolio-grade capstone

Documented, reviewable and connected to the learning record.
